

JUNIOR WEB DEVELOPER

Have you yearned to work on stuff that leaves the world a better place? Ever wanted to stand back at the end of the day and see how your 8 hours made a difference? This is the opportunity to do just that. Work on a highly motivated team that is working to save North American Charities over \$1 billion dollars every year. Want to contribute to our lofty goal? Join Team Frendo.

The Junior Web Developer will work with the development team to contribute to the evolution, support, and maintenance of our current projects. The primary responsibility of the Junior Web Developer will be to provide support for internal systems and site users.

The ideal Candidate will have:

- Minimum 3-5 years application development experience in a team structured environment
- University degree in a computer related field
- Experience working with C#, ASP.NET, HTML/CSS, jQuery and HTML5/CSS3
- Proficiency with UI and UX
- Social integration knowledge
- A strong understanding of Content Management systems
- Flexibility regarding hours worked, and a willingness to travel

* Bonus Points will be given to candidates with mobile development expertise!

Skills we're looking for:

- Solid understanding of programming fundamentals
- Detail oriented and technically advanced with computers
- Ability to stay focused, organized and calm in a fast paced environment

Perks of working at Frendo (let's pretend we're not bragging here):

- We're not your typical nine to five organization
- Our awesome culture and family-like dynamic
- This just isn't a job to pay your bills, we're changing the world
- Great benefits package & vacation time

Think you want to hang out with us on a daily basis? Send your resume to careers@businessinstincts.ca (please put Junior Web Developer in your subject line.)
